EDUCATION

York University
BSc, Computer Science

Toronto, ON
Sep. 2021 – Dec. 2025

EXPERIENCE

RAVL
Software Engineer – Client: Major Canadian Financial Institution

Toronto, ON
Apr. 2026 – Present

- Built an internal **version-management workflow** for analytics platform components, reducing manual effort by **40%** and accelerating change promotion across higher environments.
- Improved the **storage and compute deployment architecture**, consolidating migrations across environments into a single automated step to streamline higher-environment change management and simplify new-team onboarding.
- Designed and implemented the integration between an **on-premises third-party analytics platform, Azure Databricks, and Unity Catalog**, enabling governed cloud-data access through enterprise identity, networking, and permissions.
- Building **enterprise-ready infrastructure for Databricks Genie**, including **budget controls, governed data access, and agent deployment pipelines** to enable scalable enterprise adoption.

Best Lassonde
Software Engineer & Product Owner

Toronto, ON
Apr. 2025 – Sep. 2025

- Built an **AI-powered business intelligence platform** with production-grade **data pipelines**, giving SMEs access to **predictive analytics**, macroeconomic forecasting, and automated insight generation.
- Built a **Go-based** orchestration layer for **ETL/ELT** and AI workflows, coordinating distributed **Apache Spark** pipelines with **MLlib** regression, clustering, and anomaly detection.
- Designed a multi-tenant data architecture using **Apache Iceberg, PostgreSQL, pgvector**, and **Redis**, supporting schema evolution, semantic queries, and stateful LLM workflows while reducing response latency by **~25%**.
- Selected into **Microsoft, Cloudflare, Databricks, and Lassonde BEST** startup programs, securing cloud credits and mentorship.

York University
Research Assistant

Toronto, ON
Mar. 2024 – Mar. 2025

- Translated academic **inclusive-design research** into an accessibility-focused **Next.js** app and reusable **React component library**, improving usability for **5000+** students with disabilities.
- Developed a **data aggregation tool** with **TypeScript** that fetches web mentions, news, and resources into a central board, helping students with disabilities access updates faster.

Zyfera
Software Developer Intern

Toronto, ON
Jan. 2024 – Aug. 2024

- Built an **AI-powered** personal finance tool with **Svelte, TypeScript**, and **PostgreSQL**, providing simplified calculations and personalized recommendations with user-friendly explanations.
- Implemented **TypeScript** pre-/post-processing and **Edge Functions** around API calls, lowering costs by **10–30%**, cutting response time by **~15%**, and improving reliability.
- Implemented **CI/CD** pipelines with **GitHub Actions**, automating deployments across development and production environments.

York University
Computing Support Assistant

Toronto, ON
May 2023 – Dec 2025

- Resolved **750+** software, hardware, and network issues while supporting faculty and staff.
- Led **client onboarding** and delivered **product demos** for new faculty and external clients, ensuring smooth adoption and clear communication of **technical workflows**.

PROJECTS

ckm | *Go, Docker, Prometheus, Grafana* ([GitHub](#))

- Go service that schedules and runs containers while visualizing scheduling behavior with Prometheus and Grafana.

issuesight | *Go, Next.js, PostgreSQL, Redis, OpenAI* ([GitHub](#))

- Built an event-driven platform that ingests GitHub issues and generates AI-powered guidance on prerequisites, architecture, and implementation for beginners.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Go (Golang), Java, C, Shell, SQL, HTML, CSS

Tools & Platforms: Git, Docker, Linux, GitHub Actions, Terraform, Prometheus, AWS, Azure, PostgreSQL, MySQL, Django

Concepts & Methodologies: IaC, REST APIs, CI/CD, Agile, Data Lakes, LLMs, ML, System Design, Microservices, MVC
